

Together, we can reach higher summits in IgAN research.

Join the RAINIER Study today.

What is the RAINIER Study?

This study will evaluate a study drug versus placebo given every 4 weeks to people with immunoglobulin A nephropathy (IgAN) to learn if it impacts the disease.

Who might be eligible for the RAINIER Study?

- Are you 18 years or older?
- Are you diagnosed with IgAN from a kidney biopsy, or are you willing to have a biopsy if needed?

Study participants may receive*:

- Study drug or placebo (which contains no active ingredients)
- Support from a specialized study team
- Reimbursement for travel and study participation expenses
 - Ask study staff about your travel and expense options
- An opportunity to help advance rare autoimmune disease research

**Provided at no cost to participants.*

Talk with your doctor to learn if the RAINIER Study might be a good option for you.
